

# Presstek Plate Technologies Corporate Headquarters Hudson, New Hampshire

---

This 52,000 SF office space is Presstek Plate Technologies Corporate Headquarters. This was an addition to the existing manufacturing facility that was also designed by Berard Martel. The program requirements for the building focused on both the executive and customer needs for the space. These included a museum/exhibit area, full kitchen/dining facilities and hi-tech audio visual conference spaces. The adjacent manufacturing wing can be observed through viewing panels on both levels. The hospitality capacity provides for stockholder meetings and other business functions. This project was awarded the NH/VT Association of Builders and Contractors Certificate of Merit Award.
