

NH Hockey 2000

Hooksett, New Hampshire

Berard Martel designed this 35,000 SF ice hockey rink facility off Route 3A in Hooksett, New Hampshire. The single rink facility offers concessions, four locker rooms, a handicap accessible elevator and a second story mezzanine with seating for 450 visitors. The construction of the pre-engineered metal building was completed in December 2000. The NH facility was a design/build effort with Kelly Construction heading the team as the construction manager. This facility is in demand 'around-the-clock' and is the practice rink for the Manchester AA hockey team, The Manchester Monarchs.
