

Allegro Microsystems, Inc. Manchester, New Hampshire

Allegro Microsystems came to Berard Martel to design and fitup a 110,000 SF space. They required a number of areas in the building including offices, conference rooms, manufacturing areas, break rooms and reception areas. The interiors work included a vast array of services including space planning, finish and furniture selection, and custom millwork including cabinetry for break areas and custom reception desk. The designers also worked to select and place all of the artwork in the facility to give the space that finishing touch.
