

Presstek Corporate Headquarters Hudson, New Hampshire

Presstek Headquarters, located in Hudson, NH, is the second phase of project designed by Berard Martel. Prior to the headquarters, the adjoining manufacturing facility had been designed and completed. The design team was involved in many aspects of the interiors including the interior architecture and space planning, extensive millwork including reception desks and accent columns, stair railing details, and lighting choices for a variety of areas. Some of the amenities included in the headquarters building are executive suites, management offices, a cafeteria and product showrooms.
