

Carriage House Junction Hamilton, Massachusetts

This 20 unit townhome development is nestled in a neighborhood that includes spacious horse farms. Designed as a 40-B housing development to meet low affordability for qualified workforce housing occupants in Massachusetts, each unit has 3 bedrooms, a single-car garage and generous living space.

A variety of exterior building facades was achieved by adjusting the eave height on the front elevation as well as siting the buildings to the sloping land to minimize grade changes.
